

Welcome to the new United New York Ambulance Network website. United New York Ambulance Network (UNYAN) is a professional trade association representing many proprietary ambulance providers across New York State from Long Island to Watertown. Our organization provides emergency and non-emergency ambulance services to the communities in which we serve.

UNYAN's general membership is represented by 40 commercial ambulance providers that form a network to share information on a variety of issues and initiatives.

The Association views pre-hospital care as a critical component of the entire medical care system. **Mission Statement**

The purpose of the United New York Ambulance Network is to develop relationships between New York State Certified Ambulance Service providers, to enhance access to quality, affordable, and timely pre-hospital patient care services. The Network shall be committed to the advancement of the Emergency Medical System while maintaining the highest level of patient care.

### **UNYAN Member on the Radio**

Our very own Les Freemantle (Mohawk Ambulance) was featured on a news radio program on Talk 1300 here in the Capital District. Les informed listeners of Mohawk's services and use of advanced technology to best serve their local communities. He also stressed the important role all emergency service professionals play on a daily basis.

Click below and listen to what Les has to say.
